

Active Energies Solar - Residential Service Billing

Thank you for choosing Active Energies Solar. If you purchased your system from Active Energies Solar, your original contract dictates the official specific legal terms of any warranty you have with us. If your system was not installed by Active Energies Solar, you will likely void any warranty you may have with your original installation company by allowing us to service your system. This document is designed to summarize our Residential Service Billing details for ongoing service work.

Service Fees

Truck Roll Fee \$125.00
Travel Mileage \$0.65/mile
Labor \$85/hour

Responsible Recycling Fees

	<u>Rate</u>
Optimizers / Microinverters	\$25
Modules	\$49
String Inverters	\$65

System monitoring:

We encourage you to check your monitoring system regularly and let us know if you have any questions or concerns that arise. We do not provide proactive monitoring of your system.

Warranties:

Your system has two kinds of warranties associated with it, the Active Energies Solar Workmanship Warranty, and manufacturer-provided Manufacturing Limited Warranties or Original Equipment Manufacturing (OEM) Warranties:

- The Active Energies Solar Workmanship Warranty is applicable as stated in your original contract. The workmanship warranty covers issues that are a direct result of the work completed or actions taken by our install team during the installation process.
- Original Equipment Manufacturer (OEM) Warranties vary and are applied at the sole discretion of the manufacturer. These warranties generally cover the material costs of eligible pieces of equipment. **These warranties do not cover the required labor associated with on-site troubleshooting or replacing the piece of equipment.**
